Select the **sound symbol** to listen to the audio

After each category of exercises is finished a **Summary** of the User's progress appears together with the Correct answers.

Select **Continue** for moving on to the next set of exercises

User's guide for revision exercises

Serlet revision exercises aim to test the user's knowledge upon basic vocabulary and phrases of the regional language already provided in the previous sections of the app, using audiovisual means and variety of exercises.

The exercises are provided in sets according to their category (thematology) in a sequence with increased difficulty. If the user gives a wrong answer, immediately he receives a message with the correct answer. Each set of exercises is based on 4 essential words found in the vocabulary and dialogues of each category (lesson). There are 20 sets of exercises in total.

At the end of each set, the user can see a summary with his score and all the correct answers of the set. The user can have a second chance to the exercises, only when he has finished answering all sets of exercises.
